

Thank you for choosing the Greenhouse effects Roots Fuzz

Input 9v Output (Use Regulated Power adapter 2.1mm negative pin)

Volume Control –

Boosts your signal up.

Tone Control (Filter)

– Turn clockwise for more highs, counterclockwise for darker tones, fully closed is a nice sweet spot to try too.

Sustain Control – Starts with medium gain, through to heavy distortion and all the way to full wall of sound Fuzz.

Red Channel-

Open, Smoother on high gain, more headroom with a touch of upper octave at Maximum gain.

Blue Channel-

Tight, Dense, darker and compressed. Notes bloom with long sustain.

Dual Switching System (DSS)

Push and release for Bypass/On
While on, hold footswitch longer than 200mS to switch channels.
